Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-12 drawn to method and a machine readable storage for solving a respiratory tract model, classified in class 702, subclass 019.

Group II: Claims 13-15 drawn to a system for solving a respiratory tract model, classified in class 702, subclass 019.

The inventions are distinct and divergent, each from the other because of the following reasons:

The invention of Group I is unrelated to Group II. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Groups I and II have different modes of operation. Group I is directed to a method and machine readable storage medium for solving a respiratory tract model. More specifically, Group I recites steps directed to selecting a group of input parameters, computing a probability density function, and solving a respiratory. Group II, however, recites critical limitations that are distinct from Group I. Specifically, Group II recites a 'scenario specification module', a 'Latin hypercube' module', and a 'particle deposition' module that are not recited in Group I. Therefore Group II has a different mode of operation than Group I. In addition, the burden of search is maintained as the examination process requires a search of non-patent literature, U.S. patent publications, U.S. patents, as well as foreign patent literature.

Art Unit: 1631

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
